

# HobbyFindr

Hannah DaSilva, Caden Fisher, and  
Angelique Gonzalez

# What is HobbyFindr?

- *Discover new hobbies*
- *Find events near you*
- *Join activities*
- *Create your own events*
- *Connect with people with similar interests*

# The Problem—→ Our Solution

- *Finding events or activities can take time*
- *Can be difficult to find other people with the same interest/experience level*
- *Hard to learn or try new hobbies*
- *We can combine the hobby discovery and local events*
- *Match users through shared interests/experience levels*
- *Let users join and create activities to build connections*

# Why we designed HobbyFindr

*Makes discovering new hobbies and meeting people with similar interest easier*

- *Discover: Trying something outside your comfort zone*
- *Connections: Shared hobbies, interest, and experience levels*
- *Participate: Find, join, or create activities that bring people together through local events*

# Match Finder

# How the code works

- *HTML: Creates the button*

```
<button data-hobby="Photography">
```

```
    Save Hobby
```

```
</button>
```

- *CSS controls the overall appearance*
- *JavaScript makes the button interactive*

# How we can expand

## Prototype

- *Hobby discovery*
- *Interest selection*
- *Simple event*
- *Basic instructions*
- *Temporary/ browser-based data*
- *Front-end prototype*

## Future

- *Full-Stack application*
- *Functioning database*
- *User accounts and saved profiles*
- *Location-based events*
- *Search and filters*
- *IOS/Android app*
